

Student Accounts

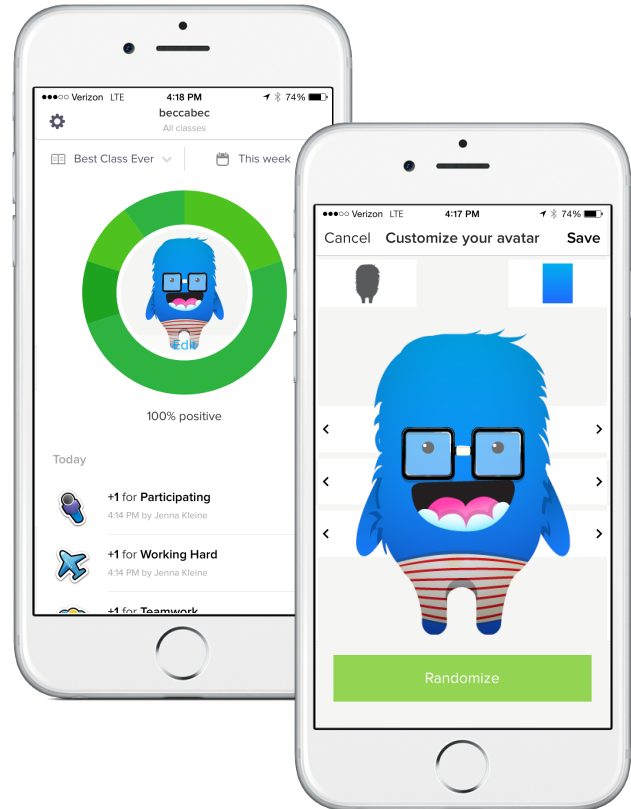

Student ownership

Teachers love getting students signed up to ClassDojo because it gives students more ownership of how they are doing in class.

Students can check their progress for the week, view feedback given by their teachers, and customize their own monster to show up in class!

Limitations

Students can't view other students' point totals, message with other students, or message with teachers.

Download student codes!

Each student needs a student code in order to create an account. Here's how to download all student codes*:

1. Select the class
2. Click the "Settings" wheel and choose "Student accounts"
3. Click the blue "Download and print all invites" button. This will download a PDF with your students' codes
4. Save the PDF to your computer, print it out, and distribute the unique codes to your students. They'll use these codes to create accounts at **www.classdojo.com** or on the ClassDojo app.

*You can only download student codes from the Web

Student Accounts

What if a student is in more than one class?

Students can add all of their student codes to the same account and track their progress across multiple classes. It's simple!

How does ClassDojo keep student information safe?

We take privacy very seriously — we never share any of your students' personal information. Check out classdojo.com/privacycenter for more information.

What if students forget their username or password?

Click on the class that the student is in, click the settings button and select “Connect students”. Here, you'll see your students' usernames and have the option to reset their password if necessary.

How are student accounts different from parent accounts?

Both parents and students can view feedback given by the teacher, however, only parents can view teacher comments and message with the teacher.

Students love classroom decorations!
